EDUCATION

University of California, Santa Cruz **GPA: 3.44**
B.S. Computer Science *Expected, May 2023*

- **Activities**: Neurotech SC, Google Developer Student Club at UCSC, Cruz Hacks, Santa Cruz Artificial Intelligence

EXPERIENCE

Xenia Gifts **San Francisco, CA**
Software Engineer Intern *Jun. 2020 – Sep 2020*

- Full-stack web development in Python, Jinja (Django), JavaScript, and HTLM/CSS on Google App Engine
- Designed and implemented internal administrative systems that manually sets prices and refreshes inventory on products
- Redesigned user experience on form submissions by used session data to repopulate form fields for invalid submits
- Added form validations to catch customer typos on form fields and warn customer of potentially invalid form inputs
- Automated daily procedures by creating cron job that refreshes specific gift card discounts which decrease time wasted

MSA Systems, Inc. **San Jose, CA**
Software Engineer Intern *Jul. 2019 – Sep 2019*

- Back-end server development and software integration in Python, SQL, ASP.NET MVC on Partner Integration Team
- Lead integration support of partnered accounting software (Intacct and QuickBooks) into QStock inventory software
- Designed and implemented tutorials to transition users from past iterations of software to newly partnered interfaces
- Attained 99% inventory accuracy, 80-85% less inventory loss, and optimized pick paths for various verticals including Medical Devices, BioTech, Pharmaceuticals, eCommerce/Multi-Channels, and Consumer Packaged Goods
- Wrote and updated unit and integration tests for client and server compiled code used for continuous integration
- Used Jira and Stash (Git) for project management (planning development iterations, source control, and bug tracking)

MSA Systems, Inc. **San Jose, CA**
Software Engineer Intern *Jul. 2018 – Sep. 2018*

- Full-stack web development in Python, SQL, Bootstrap, JQuery, HTML/CSS on Warehouse Management Team
- Rewrote and migrated legacy .NET MS SQL based desktop application to newly updated Microsoft Azure platform
- Created customer-facing search widget to parse database query responses and filter results for site content-search feature
- Assisted in development of high-level validation and integration tests using dynamic testing for client compiled code
- Used TeamCity for continuous integration and deployment of Python and .NET platforms with Git version control
- Used Python and C++ to build Quality Assurance test suites for customer handheld scanner devices
- Automated daily user entry forms by creating cron jobs with Robot Framework that creates sales orders

PROJECTS

De Anza College Bookstore Application **Jun. 2020 – Sep. 2020**

- Designed and modeled back end for De Anza bookstore used for students and staff utilizing C++ and Visual Studio
- Implemented checkout module calling back-end database for cashier interface with high end optimization and accuracy
- Created Inventory and report module for students to track textbook inventory, and display wholesale or retail costs
- Improved user experience by notifying customers about available discounts, perks, and upcoming events

VOLUNTEERING

County of Santa Clara Health System **Santa Clara, CA**
Student Intern *Sep. 2019 – Dec. 2019*

- Assisted with building a SQL database to track projects within the administration services for data analysts to use
- Built macros to make shortcuts for analysts to track projects which were in progress and send notifications

County of Santa Clara Health System **Santa Clara, CA**
Student Intern *May 2018 – Aug. 2018*

- Participated in building the Access Database and built the main table with adding Diagnostic codes and referral lists
- Assisted in the Quality Assurance process by random selection, reviewing entered data, and tracking all data

SKILLS & INTERESTS

- **Skills:** Python, C/C++, SQL, HTML, CSS, Postman, Robot Framework, JavaScript Bootstrap, JQuery, ASP.NET MVC
- **Interests:** Volunteering, Nonprofits, Mentoring, Esports, Badminton, One Piece, Artificial Intelligence, Cloud storage
